

Ohio District Data Exchange (ODDEX)

Overview

Ohio District Data Exchange (ODDEX) is the primary application for a number of smaller applications districts will use for data verifications and exchanges.

Access to the application and data is restricted to authorized district and ITC personnel as well as ODE staff.

The information provided here pertains to the functions within ODDEX. For information pertaining to EMIS reporting or EMIS record types, see the latest EMIS Reporting Guide found on ODE's web site.

ODDEX applications run from most standard browsers (Chrome, Firefox, IE, Safari) and mobile devices. ODDEX does require IE greater than 8 or Firefox greater than 10.
